Q: How to insert value at spot using LOAD_FILE Linux Sorry to bother you, I have a problem. I am a beginner, I want to insert some value at a spot in text file, and it works fine for regular text. However, in my case, I have a file that contains binary information. I want to change the value of this binary information at a certain position, and save it, but it doesn't work. How to convert binary text into other data format? I hope someone can help me. Here is my code:

```
EditText editText; EditText editText2; @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity_main); editText = (EditText) findViewById(R.id.editText); editText2 = (EditText) findViewById(R.id.editText2); editText.setText("012345"); editText2.setText("C3"); BufferedReader reader = null; try { File file = new File("c:/Users/Green Tracker/Desktop/Program/test.txt"); FileInputStream inputStream = new FileInputStream(file); reader = new BufferedReader(new InputStreamReader(inputStream)); String line = reader.readLine();
```
